

Needs for Fall

Data

Full database of dollar amounts spent by municipalities counted toward CHAMP

Full Bonds Data Access (not likely)

Shorter Horizon Flood Data

Goal

Use short-term (5-10 years) flood estimates along with exact dollar amounts committed to CHAMP (proxy for flood/rainwater mitigation) to quantify the effect of flood risk and resilience on bond spreads.

Note

In the meantime, we will attempt to reorganize our data and see if these values can be extracted.
